

Journey of Discovery: A Botanist on the Lewis and Clark Trail

THE LEWIS & CLARK TRAIL

In 1804 the Lewis & Clark Expedition started up the Missouri River into the new U.S. territory gained by President Jefferson's Louisiana Purchase. Their journey took them into lands unknown to the worldwide scientific community.

This botanical travelogue by Dr. Janet Sullivan will weave together images of the landscape and its plant species, monuments and restored sites, and journal entries by members of the Corps of Discovery on their historic journey.

Thursday, April 19, 2018 @ 7:00 p.m.
